

ABOUT US

Welcome to Naked Acres Farmstead!

Nestled atop the Niagara Escarpment, we are located just off the Wine Route and minutes from Balls Falls and the QEW. We are right across from the Beamsville Lions Park.

Here we provide local families and small business owners with quality BEEF and PORK that has been hand raised the traditional way, grass fed and pastured the way nature intended.

We raise heritage breeds for their diversity and ability to convert natural foods. Our animals take longer to raise than conventional farming methods, but it gives us more time to give back to them and the earth.

GETTING YOUR ORDER!

We offer curbside pick-up and free local delivery. Call, text, email or drop by with your order. Laura will be happy to help you.

We have grass-fed BEEF and pastured PORK. We sell our meat frozen by the pound.

WEBSITE

When you visit our website, you will find a full price and availability list. We update this weekly or as needed. We include package sizes and make every attempt to make your ordering effortless.

OUR STORY

Our farm began in 2013 out of necessity. Previously, in late 2011, our Autistic son (ATEC score 170's) was diagnosed with epilepsy and put on valproic acid the following January. The number of seizures increased 5-fold and the types of seizures increased by 3.

February 2012, we started the GAPS diet. Our son was almost 9 at the time and immediately he was saying more than 10 new words a day. He had only gained 25 new words a year prior to the diet change.

OUR STORY Cont'd

After 6 months on the diet, he had said 1,500 new words and his seizures were down to once every 3 months. Today his ATEC score is in the 50's.

Having seen first hand how food matters we want to connect other people to quality raised food.

We believe that diet makes a difference, for that reason this isn't just a business, this is our way of life.

Ordering is easy, just give us a call, text or email.

Why are we "Naked"? "cuz we got nothin' to hide".

GRASS FED, PASTURED - WHAT?

That's right, our cows eat grass, hay, and grass silage. Our pigs eat fermented grains (non-gmo's), grass and veggies from our local farmers.
